# 1. Introduction

My project Name is "**ALL IN ONE ONLINE SERVICE SYSTEM".**Customers may prefer to visit our application to find out services,instead of visiting a person. Information and step by step guidence for services using All in one online service system is available on the following guidance.

- App Registration and Login .
- Admin authorization for request.
- List out services like Medical, Carpenter ,Plumber, Hotel, Electrician, Education etc.
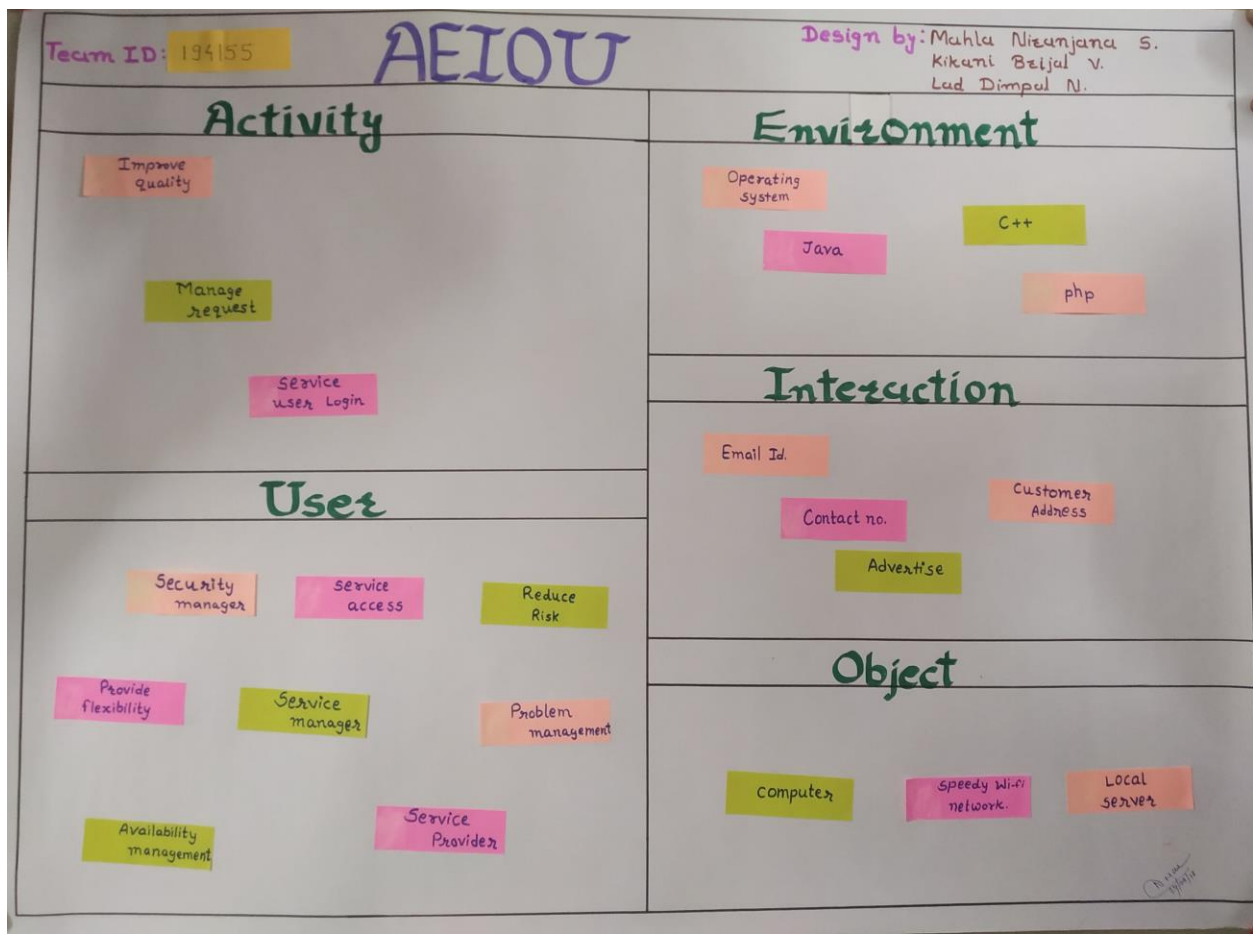

## Advantages:-

 **-**People can get speedy services

 **-**globle access,24 hours a day,7 days a week

## 2.AEIOU Canvas:

In AEIOU canvas

- **Activitie**l**s**: - Manage request, Improve quality, Service user login

- **Users:-**security manager,service access,reduce risk

2.1 figure of AEIOU canvas

## 3. Mind Mapping Canvas:-

In mind mapping canvas I have to put all that things which I want to do in my project specifically.

- Here in picture I saw that mind mapping canvas.

3.1.Figure of-Mind Mapping Canvas

## 4. Empathy Mapping Canvas
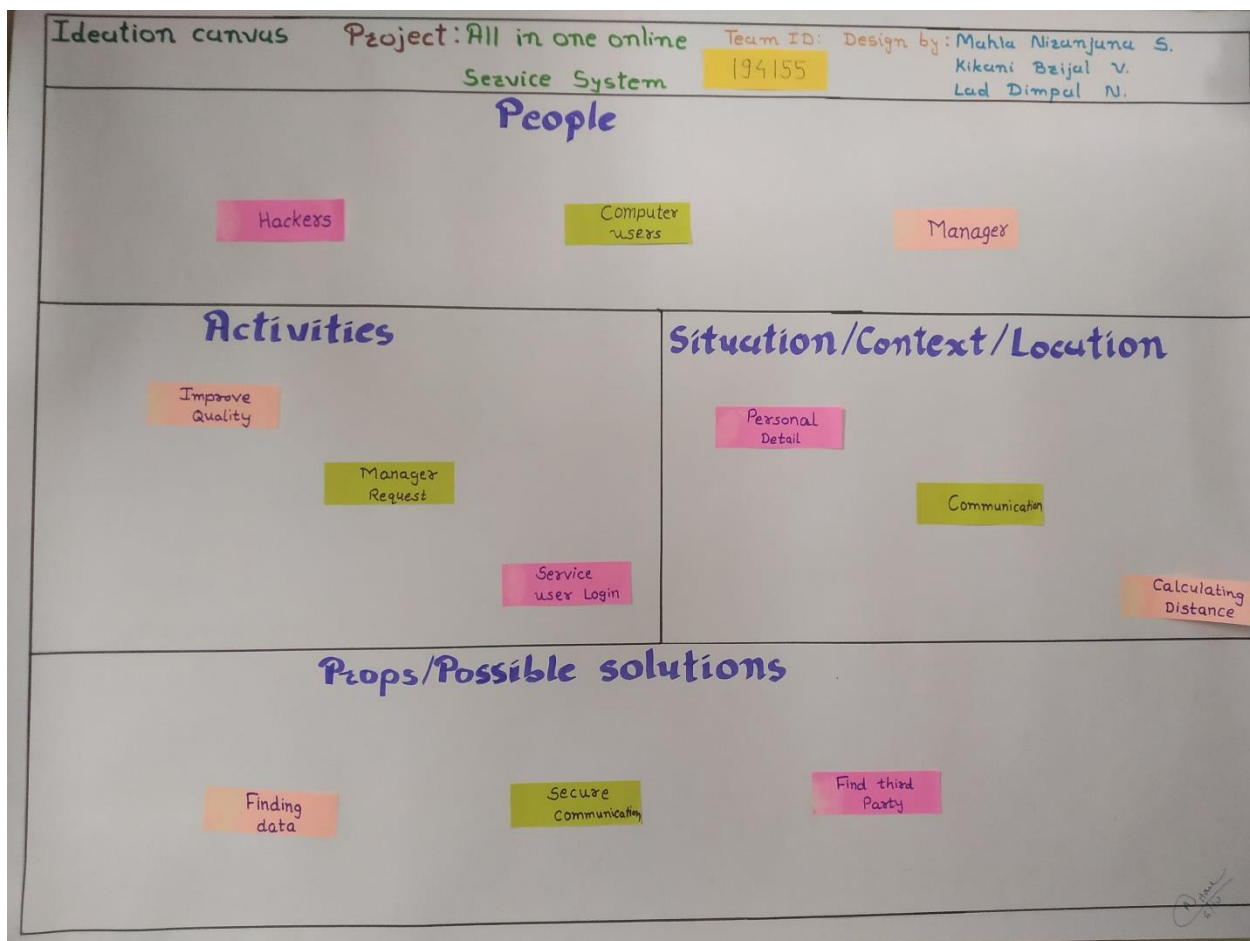

**Why use an empathy map:-**

How to use an empathy map Good design is grounded in a deep understanding of the person for whom you are designing. Designers have many techniques for developing this sort of empathy. An Empathy Map is one tool to help you synthesize your observations and draw out unexpected insights.

4.1.Figure of-Empathy Mapping Canvas

## 5.1 IDEATION CANVAS:-

Ideation canvas is a rough whiteboard where ideas can be stretched into any limits or dimensions. Ideation session is not aimed at finding solutions to the defined problem But to define the best possible problem and stretch out its possible scope. The field is set and the overall agenda is to build the clones of the ideas and pivot them throughout the canvas so as to discover new possibilities.
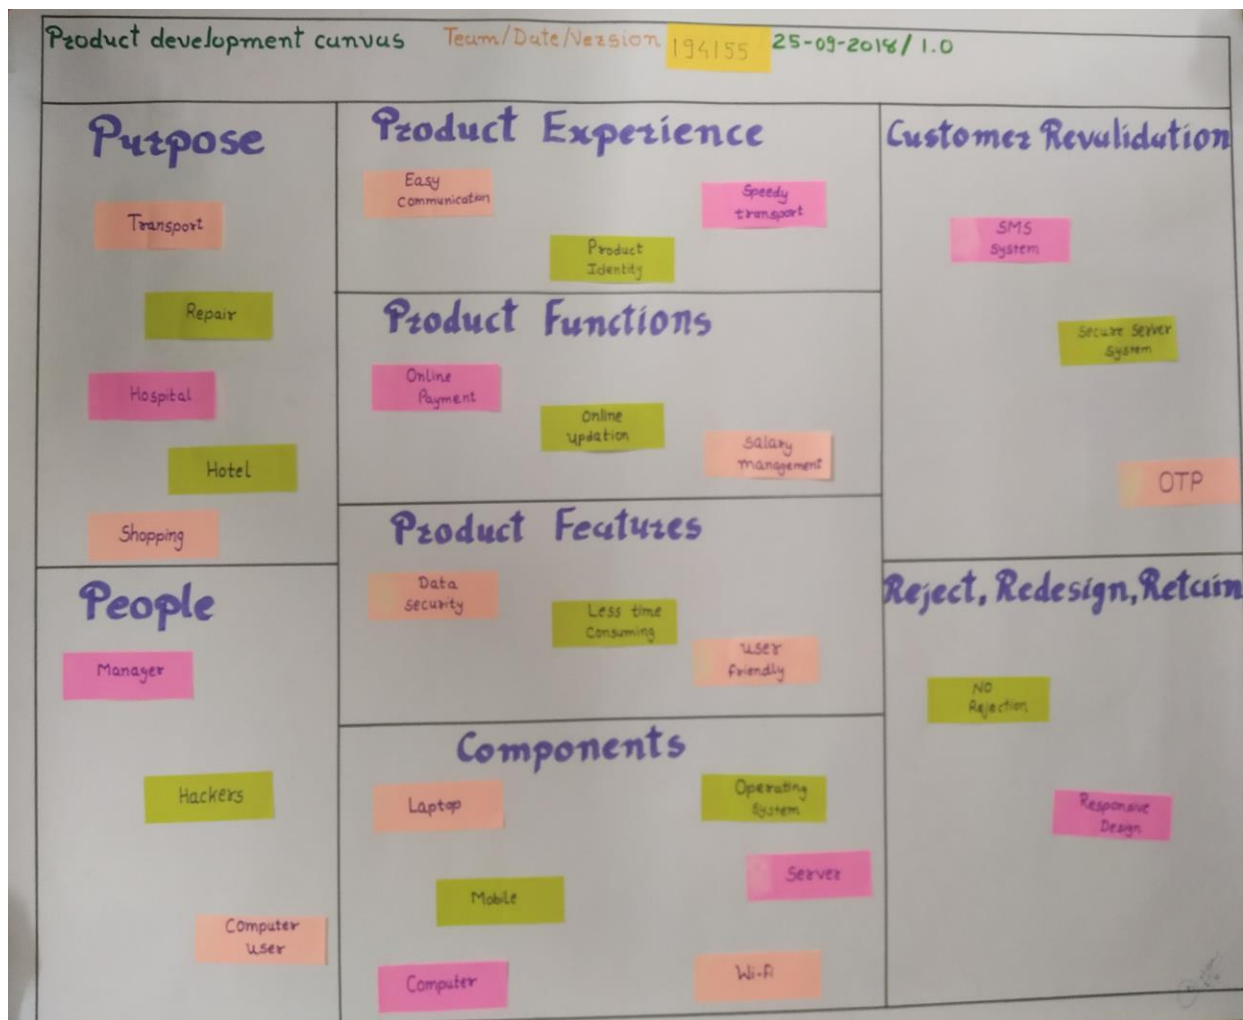

.

5.1Figure of-Ideation Canvas

## 6. Product Development  canvas:-

A product development canvas is the ground where in the best possible ideas after the ideation session are pitched and   nurtured to develop.

- **People & purpose** :-Manager, Hackers &Computer users and Transport, Repair .
- **Product/service experience**:- Easy communication,Speedy transport
- **Describing user feelings**:- It is very useful , it guides you properly, helps you .

## 7.Learning need matrix

LNM will help us to identify the learning requirement that are much needed in service providing. Also helps to justify –

- **Application process involved**:-Planning,Android studio,Eclipse
- **Applicable standerd and design specifications**:-Data dictionary,Google API,UML diagram,Activity diagram
- **Component materials & strength criteria**:- Laptop,Mobile,wi-fi,server,Xamp/Wamp
- **Software tools**:-HTML,Java,php,SQLite,Javascript,CSS

7.1 Learning Need Matrix

# 8.Conclusion:-

It will be helpful for people to find various services . It will works speedly. In this application we will suggest various types of services like Carpenter, ,Plumber, Hotel, Transport, Shopping, Electrician, Hospital. We will suggest best services as per their requirements.
